- **Header:** Profile picture, Username, Bio, Location, Website.
- **Content:**
  - **Post/Story/Reel/Video:**
    - **Image/Video:** Main content, @username, Hashtags, Location, Caption.
  - **Buttons:**
    - “Like”: Like button, Like count.
    - “Comment”: Comment button, Comment count.
    - “Share”: Share button, Share options (Direct, Story, Post, Email, etc.).
- **Empty State:** No posts, No comments, No shares.

#### 7.7. app/analytics.html – Analytics Dashboard

- **Header:** Date range, Filter, Refresh.
- **Tabs:**
  - Platform Analytics: Overview, Reach, Engagement, Conversion.
  - Audience Analytics: Demographics, Interests, Location, Activity (Heatmap).
  - Content Performance: Reels, Posts, Stories, etc.
- **Visualizations:**
  - **Line Chart:** Growth over time.
  - **Bar Chart:** Performance by category.
  - **Heatmap:** Activity over time.
  - **AI Insights:** Recommendations, Predictions.

#### 7.8. app/templates.html – Template Editor

- **Header:** Template name, Description, Tags, Actions (Emails, Replies...).
- **Content:**
  - **Text:** Text input, Rich text editor.
  - **Image:** Image input, Image gallery.
  - **Form:** Form input, Form validation.
  - **Buttons:** Button input, Button styles.
- **Preview:** Preview button, Preview window.
- **Save:** Save button, Save options.

#### 7.9. app/assets.html – Asset Library

- **Header:** Search, Filter, Sort, Actions (Upload, Delete...).
- **Content:**
  - **Grid:** Thumbnail, Title, Description, Actions.
  - **“Add New”:** Add new button, Add new modal.
  - **Drag & Drop:** Drag & Drop functionality.
  - **Panel:** Panel for asset details, Panel for asset actions.

#### 7.10. app/notifications.html – Notification Center

- **Header:** Filter, Sort, Actions (Mark as Read, Delete...).
- **Content:**
  - **Notification:** Notification item, Notification details.
  - **“Mark as Read”:** Mark as Read button.
  - **Workspace Settings:** workspace-settings.html.

#### 7.11. app/team.html – Team Management

- **Header:** Team name, Description, Actions (Add, Edit, Delete...).
- **Content:**
  - **Team:** Team member, Team role, Team status.
  - **“Add New Team”:** Modal (Add New + Add New).
  - **Team Settings:** Team settings, Team actions.

#### 7.12. app/workspace-settings.html – Workspace Settings

- **Header:** Workspace name, Description, Actions (Add, Edit, Delete...).
- **Tabs:**
  - **General:** workspace, Logo, Profile picture.
  - **Brand Voice:** Brand voice, Brand voice options.
  - **Notifications:** Notifications, Notifications settings.
  - **Advanced:** Advanced settings, Advanced actions.

#### 7.13. app/account-settings.html – Account Settings

- **Header:** Account name, Description, Actions (Add, Edit, Delete...).
- **Content:**
  - **Account:** Account member, Account role, Account status.

- **Authentication Flow** (User Login → Password Verification → Session Creation).
- **Authorization Flow** (Role-Based Access Control + Permission System + Audit Log).
- **Security Features** (2FA, Password Complexity, Account Lockout).
- **UI/UX** “Modern Dashboard with Dark Mode” (UI Design: Clean, Responsive, Intuitive).

## 8. **Admin Panel** (Admin Panel)

-----  
**Admin Panel Structure** (Admin Panel Structure): Sidebar (Navigation), Top Bar (User Profile, Logout), Main Content Area.

### 8.1. admin/admin-login.html – **Admin Login Page**

- **Form Fields**: Username, Password, Remember Me (checkbox), Login button.
- **Validation**:
  - Username/Password length + Email format.
  - **“Invalid Credentials”**.
  - **“Account Locked”** (if applicable).

### 8.2. admin/admin-dashboard.html – **Admin Dashboard**

- **Overview**: High-level summary of system status, SaaS metrics.
- **Key Metrics**:
  - **System Health** (CPU, Memory, Disk I/O).
  - **Workspaces** (Active, Pending, Failed).
  - **User Activity** (Logins, Sessions).
  - **AI Model Performance** (Accuracy, Latency).
- **Navigation**:
  - **System Settings**.
  - **Workspaces**.
  - **Users**.
- **“Recent Workspaces”**: List of Workspaces with status, creation time, and actions.

### 8.3. admin/admin-users.html – **User Management**

- **Form Fields**: Username, Email, Password, Role (dropdown), Create button.
- **Validation**:
  - Username/Email uniqueness + Password strength.
  - **“User Already Exists”**.
  - **“Invalid Email”**.
  - **“Invalid Password”** (admin-user-details.html).
  - **“Invalid Role”**.

### 8.4. admin/admin-user-details.html – **User Details**

- **Form Fields**: Username, Email, Password, Role, Create button.
- **Validation**:
  - Username/Email uniqueness + Password strength.
  - **“User Already Exists”**.
  - **“Invalid Email”**.
  - **“Invalid Password”** (admin-user-details.html).
  - **“Invalid Role”**.

### 8.5. admin/admin-workspaces.html – **Workspace Management**

- **Form Fields**: Workspace Name, Description, Role (dropdown), Create button.
- **Validation**:
  - Workspace Name uniqueness + Description length.
  - **“Workspace Already Exists”**.
  - **“Invalid Role”**.
  - **“Invalid Password”** (admin-workspace-details.html).
  - **“Invalid Role”**.
  - **“Invalid Workspace”** (Workspace).

### 8.6. admin/admin-workspace-details.html – **Workspace Details**

- **Form Fields**: Workspace Name, Description, Role (dropdown), Create button.
- **Validation**:
  - Workspace Name uniqueness + Description length.
  - **“Workspace Already Exists”**.
  - **“Invalid Role”**.

- ```
- ■■■■■■ API (■■■■■■ ■■■■■ AI ■■■■ ■■■■■).
- Maintenance Mode:
- ■■■■■/■■■■■ ■■■ ■■■■■■■■.

9. ■■■■■ ■■■■■■■ ■■■■■■■

## 9.1. 404.html – ■■■■■■■■ ■■■■ ■■■■■■■■

- [illegible]

## 9.2. 500.html – ■■■ ■■ ■■■■■■

- [illegible]

10. ■■■■■ ■■■■■ ■■■■■■■-■■■ (Roadmap ■■■■)

[illegible]

■■■■■■■■ 1 – ■■■■■■ ■■■■ Design System ■ App Shell

- **base.css**: reset
- **layout.css**:
- **components.css**:
- **utilities.css**: (flex, spacing, text-align...).
- **components-playground.html**:
- **App Shell** /app/\* /admin/\*:
- **Sidebar + Topbar + Content Area**.
- **RTL + Responsive**.

■■■■■■■ 2 – ■■■■■■■■ ■■■■■■ + Auth + Onboarding

- [illegible]

3 – Creator App

- [illegible]

#### Module 4 – User Interface Design and Development

- **UI Design:**
  - app/analytics.html
  - app/templates.html
  - app/assets.html
  - app/notifications.html
  - app/team.html
  - app/workspace-settings.html
  - app/account-settings.html

#### Module 5 – Backend Development and Integration

- **Backend Development:**
  - admin-login.html
  - admin-dashboard.html
  - admin-users.html + admin-user-details.html
  - admin-workspaces.html + admin-workspace-details.html
  - admin-plans.html + admin-plan-edit.html
  - admin-ai-tools.html + admin-ai-tool-edit.html
  - admin-ai-usage.html
  - admin-tickets.html + admin-ticket-details.html
  - admin-settings.html
  - admin-logs.html

#### Module 6 – Deployment, Performance, and Security

- **Deployment:** 404.html + 500.html.
- **Performance:** Responsive + Mobile Optimization.
- **User Experience (UX):**
  - **Navigation:** Streamlined navigation structure.
  - **Forms:** User-friendly form design.
  - **Feedback:** Toasts/Modals for user feedback.
- **Security:** Implement security measures to protect user data and system integrity (Pentest, OWASP).

#### Final Project: End-to-End Development and Deployment

- **Project Overview:** Define project goals and scope.
- **Requirements Gathering:** Gather user requirements (Functional + Non-Functional).
- **Design Phase:** Create UI/UX design.
- **Development Phase:** Implement frontend and backend.
